SUMMARY

Dedicated and passionate B.Tech (Information Technology) student with hands-on experience in programming, web development, and machine learning. Eager to contribute technical expertise to a dynamic team through internship opportunities and gain real-world experience in software development and problem-solving.

TECHNICAL SKILLS

Programming Languages:	Python, Java, SQL
Web Technologies:	HTML, CSS, JavaScript
Machine Learning:	Scikit-learn, Pandas, NumPy
Tools:	Git, GitHub, Jupyter Notebook
AI Skills:	Machine Learning, Generative AI

WORK EXPERIENCE

Machine Learning Intern	may 2026 – july2026
<i>OneStop</i>	Remote

- Developed and tested machine learning models using Python.
- Cleaned and analyzed datasets for model training and evaluation.
- Created responsive web interfaces using HTML, CSS, and JavaScript.
- Managed projects using Git, GitHub, and Jupyter Notebook.

Full Stack Java Intern	May 2025 – July 2025
<i>SkilDzire</i>	Remote

- Developed end-to-end web applications using Java, HTML, CSS, and JavaScript.
- Gained hands-on experience in frontend and backend development, including UI design and server-side logic.
- Worked with Java-based frameworks and implemented basic CRUD operations.
- Designed and managed relational databases for storing and retrieving application data.

PROJECTS

AI Chatbot Web Application	Link to Demo
-----------------------------------	------------------------------

- Developed a responsive AI-powered chatbot interface using HTML, CSS, and JavaScript.
- Designed an interactive chat UI with dynamic message rendering and smooth scrolling.
- Integrated a third-party LLM API using `fetch()` to generate real-time chatbot responses.
- Implemented asynchronous communication (AJAX) to handle user queries without page reload.
- Built reusable functions for message creation, API handling, and UI updates.

Human Action Detection	Link to Demo
-------------------------------	------------------------------

- Built a machine learning model using Python and OpenCV to detect human actions from video sequences.
- Performed data preprocessing, feature extraction, and model training for accurate prediction.
- Achieved good accuracy in classifying actions like walking, running, jumping, etc.

Student Performance Prediction	Link to Demo
---------------------------------------	------------------------------

- Developed a ML model to predict student performance based on academic and personal factors.
- Cleaned and analyzed the dataset using Pandas and visualized key insights.
- Trained and evaluated multiple models and selected the best performing one.

EDUCATION

Aditya University	2023 – Present
<i>B.Tech in Information Technology</i>	CGPA: 7.6 / 10.0

CERTIFICATIONS

- Certified in Database Management System (Infosys Springboard)
- Certified in Java Programming

- Certified Intern at SkillDzire
- Certified in Operating Systems (Infosys Springboard)
- Certified in Python Programming (HackerRank)
- Certified in SQL (HackerRank)
- certified in machine learning at onestop
